PROFILE SUMMARY

Full-Stack Developer and Agentic AI enthusiast with hands-on experience building B2B SaaS platforms, property management systems, and AI-powered agents. Proficient in Next.js, React.js, TypeScript, FastAPI, PostgreSQL. Passionate about designing scalable architectures, implementing RBAC, and integrating LLM-based agentic workflows to deliver intelligent, production-ready applications.

SKILLS

Technical Skills: HTML, CSS, JavaScript, TypeScript, C++, OOP, PostgreSQL, MongoDB, REST APIs, Python, AG-Grid
Frameworks & Libraries: React.js, Next.js, FastAPI, Axios, Material UI, Tailwind CSS, Redux Toolkit
Tools & Platforms: Git, GitHub, Postman, Vercel, Netlify, AWS Cognito, AWS Lambda, **Soft Skills:** Teamwork, Adaptability, Problem-Solving, Critical Thinking

EXPERIENCE

Software Engineer | Remote Bricks January 2025 – Present
Web Application | B2B SaaS Intern: Jan 2025 – Oct 2025 Full-Time: Oct 2025 – Present

- Engineered a scalable B2B SaaS platform; deployed Single Sign-On (SSO) via AWS Cognito for seamless multi-workspace access.
- Built server-side event streaming for real-time notifications on jobs and comments, reducing polling overhead by 60%.
- Architected advanced nested filters with dynamic AND/OR operations for granular data exploration, boosting query efficiency by 35%.
- Integrated server-side sorting, filtering, searching, and pagination for large dataset management, cutting latency by 45%.
- Constructed an Alert Module powered by AWS Lambda to offload real-time event triggers, reducing DB load by 40%.
- Designed a role-based permission system supporting custom user roles, improving access governance across enterprise clients.
- Optimized frontend bundle size by 30% through code-splitting, lazy loading, and tree-shaking strategies.
- Developed a reusable component library of 20+ UI components with TypeScript generics, reducing feature development time by 25% across teams.

Frontend Developer Intern | goFloww July 2024 – August 2024
Web Application

- Built the NETMOS project with unified UI across courier modules (Order Details, Fleet, Startup Details); implemented robust form validation, serving 1,000+ daily active users.
- Delivered a paper-based logistics solution increasing market revenue and job opportunities by 20% in North-eastern states.
- Built E-KYC module reducing onboarding time by 30%; enhanced accessibility and cross-browser compatibility for all modules.
- Collaborated with backend engineers to integrate 10+ REST APIs, improving data accuracy and reducing frontend error rates by 35%.

EDUCATION

Bhagalpur College of Engineering, Bhagalpur (Bihar) 2021 – 2025
Bachelor of Technology in Electronics and Communication Engineering 7.9 / 10.0 CGPA

PROJECTS

Property Management Dashboard Full-Stack Project

- Built a full-featured property management web app with analytics dashboards, improving operational visibility by 50% via real-time metrics.
- Implemented RBAC (Admin/Tenant/Owner) with JWT authentication, eliminating unauthorized access; added CSV bulk upload reducing manual entry by 65%.
- Designed RESTful APIs using FastAPI with PostgreSQL, achieving sub-100ms response times across all dashboard endpoints.

Task Management System Full-Stack Personal Project

- Developed a full-stack task management app with JWT authentication, secure login, and session persistence using HTTP-only cookies.
- Built RESTful APIs with FastAPI and integrated with MongoDB Atlas, ensuring user-scoped data isolation.
- Implemented task lifecycle management (Pending, In-Progress, Completed, Overdue) with priority levels and automated overdue detection.
- Added search, filter, and sort features with a Kanban board and analytics dashboard, improving productivity by 40%.
- Deployed on Vercel with CI/CD pipeline; achieved 99.9% uptime and sub-200ms average API response time.

CERTIFICATIONS

- | | |
|---|------|
| Python for Everybody – Cisco Networking Academy | 2023 |
| Soft Skills Development – NPTEL (IIT Kharagpur) | 2023 |
| The Complete Web Developer Bootcamp – Udemy | 2022 |

ACHIEVEMENTS

- Achieved top-1,000 rank in CodeChef contests, currently rated 2★ with 500+ problems solved across platforms.
- Made successful open-source contributions during Hacktoberfest with 4+ merged PRs and participated in GSSoC'24.
